

Entering Pitch Counts

- 1) Open the TeamLinkt app and select your team. Go to the **Events** icon at the bottom of the screen. From there, select the **Past** option at the top of your event list. You should see the  icon there whenever you have a previously scheduled game that has no reported scores/stats. Click on the **game** in question.
- 2) Scroll down to the bottom of the page and click on the **League Game Statistics** option. This will take you to a page where you can enter stats.
- 3) Find the Pitching section and select **+ Add players**. This will give you a list of your players to select from. Check the box for any of your players that pitched in this particular game and click on Add Players in the bottom right. This will take you back to the Game stats page where you will see the players you added. Scroll over to the right until you find the PT column (“pitches thrown”). Add the pitch counts for each player. **MAKE SURE YOU click on Save team stats** before you leave this page.

We will be monitoring compliance throughout the season. We have enough to do as it is, so please do not make us track you down.

Also, if you go to the lml.org site and navigate to Season → Stats, you can filter for a specific team and then select the “Pitcher Eligibility” tab to see when players are next available to pitch per LLI pitch count guidelines. This should by no means be considered the authority on availability, and you should make sure you know which of your players are pitching for school/travel teams as well and factor that in, but it is a handy spot to track your players and those you may be facing in your next game.
